KIOF Team of Volunteers,

Merry Christmas & Happy New Year everyone as we begin our 6th year on the air here the Las Vegas, Nevada valley on January 9, 2021. Much has been learned about the Nevada Public Broadcasting System here in the State of Nevada. Much has been exposed about the internal workings of a "failed" Nevada Public Broadcasting System here in the State of Nevada that allows a certain organization or two to be "self-enriched" while State of Nevada tax payer money is "laundered by the millions" to those very specific groups (i.e. National Public Radio - NPR affiliates, for example as seen here in the State of Nevada). Other organizations are left holding the bag and with expenses in the public broadcasting spectrum seen across numerous facilities. Apparently we have actual "communists" operating in our, We, The People, Representative Republic on American soil who have taken our nation down a very wrong path of weaponizing an industry for their buddies "benefits" and "personal gains".

I share with you the failed public broadcasting system here in the State of Nevada in a sequence of events PDF for your reading pleasure on this Christmas Day, particularly Page 43 should be of interest (fee free to share with your friends and donate accordingly knowing this information at hand). If this is happening here in the State of Nevada with the "public broadcasting system", it is surely happening in every other state in our Union . Decisions will be needed in the coming days and weeks to determine the future of America's Public Broadcasting System to root out these "communists" operating within our, We, The People, Representative Republic as the industry has grown exponentially over the past 20+ years around the nation. Do we fundamentally change the industry now in the massive advent of the Internet and online services that the general public can easily access now without a radio or television or continue as business as usual?

One area of federal law that could allow the non-commercial broadcasters greater flexibility around a failed public broadcasting bureaucracy is to remove the "chains of communism" that have allowed it to advance over these past 50+ years as seen in our country and to grant immediate emergency waivers to 47 C.F.R. 73.503 Licensing Requirements and service. This single federal statute controls the non-commercial broadcast licensing industry. It makes common sense what is seen at hand to issue waivers to select broadcasters wishing to "flip" their facilities to commercial operations and pay a simple small regulatory fee which could be achieved through a simple waiver to allow their facility's survival and potential growth - this has never been done in the American vertical markets where millions of dollars in state and federal laundering is occurring and maybe the time has come to make this simple change. This single federal statute is what has failed not only our organization when matched to state and federal funding since 2016, but many others whom our organization has reached out to with obtaining the

Merry Christmas & Happy New Year

necessary state and federal funding to grow as a "non-commercial public broadcaster" in their respective marketplaces with designers at a federal level of failed policies, rules and regulations of a by-gone era that's work for a few at the expense of the many.

I will work directly with FCC staff in the coming year to see about getting non-commercial broadcasters around the nation more flexible options with their facilities and equal access to emergency state and federal funding so they can compete on a greater equal footing in marketplaces while we all work around the "money laundering" and "communism" that has been traced to it's footing and door steps in Washington D.C. with a system designed and built for very specific organizations in the public broadcasting spectrum.

As 2020 closes, the COVID-19 Pandemic reminds us of the many heartaches we have all seen. I've shared everyone's heartaches and have passed messages, feelings and sentiments directly on to President Trump and several senior members of the Trump administration as we are truly the forgotten people here in Las Vegas, Nevada as well as numerous broadcasters around the nation on a verifiable "rigged" system that President Trump has talked to the nation about over these past 4+ years when matched to what Las Vegas Public Radio has witnessed in the American Public Broadcasting System.

All the best and be safe where ever you may be on this Christmas Day and New Year 2021.

Greg
